PROFESSIONAL SUMMARY

Full-stack developer and QA tester with internship experience building, securing, and testing a production web platform. Skilled in Next.js, React, TypeScript, and Supabase (PostgreSQL), with strengths in authentication, application security, and software quality assurance. Combines web and mobile development (Java, Flutter, Kotlin, PHP/Laravel) with a proven ability to ship and review production code in fast-moving teams.

WORK EXPERIENCE

WyzLab Solutions — WyzQuests | Remote May 2026 – October 2026

Full-Stack Developer and QA Tester Intern

- Contributed full-stack features to WyzQuests, an all-in-one learning platform (Next.js, React, TypeScript, Supabase/PostgreSQL), shipping production code across five user roles; led an end-to-end authentication migration (12 tasks across 3 phases, ~38 API routes + middleware) validated across 9 post-migration scenarios.
- Hardened the platform's security posture by remediating the security audit's only Critical finding plus 6 other issues — input validation, authentication and cookie hardening, XSS/CSRF prevention, row-level-security controls, and credential encryption; fixed 7 production bugs, including a Critical unauthenticated debug-route exposure.
- Shipped learner-facing features (cohort-based enrollment, gamified rewards, notifications, media/document handling); merged 49+ pull requests across 40+ peer-review rounds and reintroduced a CI type/lint gate that cut a 613-problem lint baseline.
- Owned 25 platform features across 8 modules for the team's handover, and executed 48 feature + 27 API test cases, reporting 16 defects (10 Critical, 5 High) with reproducible, evidence-backed steps.

PROJECTS

Lakbay: Scenic Route & Cultural POI Navigation App (Thesis)

Lead Research Documentation Coordinator & Dataset Specialist/Developer | CIIT College of Arts and Technology September 2025 – February 2026

- Served as Lead Research Coordinator, managing documentation and coordinating technical requirements between development and data science teams.
- Designed and populated a geospatial tourism database across six regions, and helped validate a machine learning-based route-optimization model using multi-criteria decision frameworks.

SKILLS

- **Languages & Frameworks:** TypeScript, JavaScript, React, Next.js, Node.js, Java, Flutter (Dart), Kotlin, Laravel/PHP, Python, C++, Unity (C#), HTML/CSS
- **Backend, Data & Security:** Supabase (PostgreSQL), SQL, Row-Level Security, REST APIs, Zod, OAuth/OTP, XSS/CSRF prevention, credential encryption, rate limiting
- **Quality & Testing:** Jest, Playwright, manual QA and test planning (ISTQB / ISO-IEC-IEEE 29119), CI lint/typecheck gates, pull-request reviews
- **AI & Tools:** AI-assisted development; maintaining and hardening LLM-powered features (prompt-injection defense, content safety); Git/GitHub, Power BI, Google Workspace

EDUCATION

Bachelor of Science in Computer Science, Major in Software Engineering — CIIT College of Arts and Technology 2022 – Present

Senior High School, TVL Strand – Programming — CIIT Senior High School 2020 – 2022

CERTIFICATIONS & AWARDS

- Awarded, Multiple Innovation Honors – 3rd Inabel Awards | 2026 (Design & Experience, Internet of Things, and Enterprise Systems Innovation)
- Nominee, Best Industry-Ready Project – 2nd Inabel Awards | 2025
- Alibaba Cloud Certification – AI Journey with Alibaba Cloud Seminar
- 2nd Runner-Up, Shark Tank Convention – CIIT College of Arts and Technology
- Project Showcase Representative – CIIT College Open House Event
